

Investor Update Q4 2019

11th February 2020

Safe Harbor Statement

Certain statements on this presentation concerning our future growth prospects are forward-looking statements, which involve a number of risks, and uncertainties that could cause actual results to differ materially from those in such forward-looking statements. The risks and uncertainties relating to these statements include, but are not limited to, risks and uncertainties regarding fluctuations in earnings, our ability to manage growth, intense competition in IT services including those factors which may affect our cost advantage, wage increases, our ability to attract and retain highly skilled professionals, time and cost overruns on fixed-price, fixed-time frame contracts, client concentration, restrictions on immigration, our ability to manage our international operations, reduced demand for technology in our key focus areas, disruptions in telecommunication networks, our ability to successfully complete and integrate potential acquisitions, liability for damages on our service contracts, the success of the companies in which Hexaware has made strategic investments, withdrawal of governmental fiscal incentives, political instability, legal restrictions on raising capital or acquiring companies, and unauthorized use of our intellectual property and general economic conditions affecting our industry

Use of Non-GAAP Financials

Hexaware has included non-GAAP financial measures in this presentation to supplement Hexaware's consolidated financial statements presented on a GAAP basis. These non-GAAP financial measures may have limitations as analytical tools, and these measures should not be considered in isolation or as a substitute for analysis of Hexaware's results as reported under GAAP.

The non-GAAP financial information that we provide also may differ from the non-GAAP information provided by other companies. We compensate for the limitations on our use of these non-GAAP financial measures by relying primarily on our GAAP financial statements and using non-GAAP financial measures only supplementally. We also provide robust and detailed reconciliations of non-GAAP earnings to the most directly comparable GAAP earnings, and we encourage investors to review those reconciliations carefully.

We believe that providing these non-GAAP financial measures in addition to the related GAAP measures provides investors with greater transparency. We further believe that providing this information better enables investors to understand Hexaware's operating performance and financial condition.
