Hexaware

Rising Star ★

"Hexaware delivers industry-leading data and analytics foundational services on AWS, through amaze® for Data & AI."

Ashwin Gaidhani

Overview

Hexaware is headquartered in Mumbai, India, and operates in more than 30 countries. It has more than 24,200 employees across 37 global offices. In FY21, the company generated $971 million (+14.9 percent YoY) in revenue, with financial services as its largest segment. Hexaware is investing in building engineering and center of excellence capabilities on AWS, with a short-term focus on developing competencies and platforms, such as amaze® for Data & AI, to accelerate the cloud journey.

Strengths

Automating data modernization and transformation at client enterprises: Hexaware delivers industry-leading DAML services on AWS, with its Amaze automation platform. This platform transforms clients' on-premises data ecosystems and big data sources to cloud in an effective, secure, rapid and economically viable manner. This is done while ensuring zero disruption to business continuity, processes, and operations.

Accelerated data transformations: Using automated data landscape discovery features and automatic data, pipeline and analytics migrations, Hexaware's AWS data analytics services ensure that transformations happen in a rapid, predictable, reliable and consistent manner.

Smart and cost-effective big data management solutions: With more than 40 metadata adapter intelligence tools and in-built knowledge of cloud gaps, Hexaware's data transformation services ensure that clients get optimal value from their data technology investments.

Caution

Hexaware is an early mover in the data transformation landscape. However, this needs to be explicitly and extensively communicated in the U.S. market, especially to clients that are already planning their AWS-based data transformation journeys.
